## Structured Mathematics

# Five Years On

**The report on a survey conducted on behalf of MEI**

**Ketaki Porkess**  
BA, BA, MSc, MBA

**August 1995**

## Acknowledgements from MEI

MEI Structured Mathematics was the first modular A-level syllabus in a major subject, and so it seems appropriate that it should also be the subject of this the first major survey into the impact of a modular A-Level course.

I would like, on behalf of MEI, to express our appreciation for those who have made it possible:

The Trustees of The Gatsby Charitable Foundation for their sponsorship of the survey;

Professor John Berry for hosting the survey at The Centre for Teaching Mathematics, The University of Plymouth;

Ketaki Porkess, a business & systems analyst, who actually carried out the survey. We were fortunate to secure her consultancy services. The large response, particularly from students and parents, resulted in the work involved being much greater than anyone predicted, but Ketaki's dedication has ensured that this has not prevented the report from being ready on time.

Irving Stegges  
Chairman MEI
